Satisfaction by Age_Group

Satisfaction by service

Patient Satisfaction by Length of Stay

Satisfaction rises slightly with longer stays, but the correlation is weak ($r \approx 0.07$) — not a meaningful driver

Carla Gray	nurse	emergency	61.54%
Cassandra Gaines	nursing_assistant	emergency	59.62%
Total			**59.98%**

INSIGHTS

Attendance is uniform across every role and department (~60%-61%) — this rules out staffing percentage as the driver of Emergency's crisis.

Staffing shortfalls raise refusals in General Medicine and Surgery, but Emergency stays maxed regardless — its constraint is beds, not staff.
